

Oh...and how is the accounting forensics going? Well you know.....right?

## And End To The Harassment?

All the parties were in place. All the people were there and ready to go – the judge, the court reporter, the court coordinator and the parties.

On the left – Attorney Jeffery Dorrell, Attorney Mark Sparks, and one other flunky from the Moystin Law Firm. On the right – a single lawyer John Morgan. And then a judge – from another place outside Jefferson County Texas.

At stake – the request from Mr. Dorrell, the same Mr. Dorrell that has a close relationship with Thomas Retzlaff, a serial stalker and convicted felon, who has attempted to shut down attorney John Morgan through an obscure set of rulings and attempts for sanctions. Using as a backdrop a “relative unknown law known as the TCPA law.”

Dorrell, Sparks and the other flunky that represents an unknown group of people that are financing a smear campaign came to court to have a judge order John Morgan to pay over \$450,000 in sanctions and attorneys fees to his ex-wife’s lawyers. And in Jefferson County that would have been par for the corrupt course – however – a visiting judge was on the case.

Now let us show you what was sent to Morgan by a pen name “John Smith” in an attempt to “scare him” over the past few days by email :

*So are you all ready to go? I think that the judge will use one of the larger courtrooms because of all the people who plan on showing up.*

*Will you once again pass out on the witness stand and pee your pants?*

*I still think that you won't show up and that the police will be called to look for you and that you will be found parked in a garage with the engine running with a garden hose running from the exhaust pipe into the window of your ugly ass car. Your face will be all blue looking, almost like an Smurf! And with luck Potato head Klein's body will be stuffed in the trunk for bonus points.*

*Hooray!!*

*Cheers–*

*Hello Mr fatso!*

*Many people falsely assume that if they swallow enough prescription medicines popularly associated with death-from-overdose that they, too, will die: whereas the truth is that most of them will simply make themselves more ill.*

*However, when used as a sole means of suicide, drug overdose is seldom successful. The potency of street drugs commonly used (such as*

*heroin) is commonly unreliable. MLD (minimum lethal dosage) is often hard to calculate and is somewhat unreliable due to outside factors such as weight, tolerance, and whether not a meal has been eaten recently. Contrary to popular belief, this is not a quick and painless method. It takes anywhere from 3 to 10 hours on average, depending on the drug taken. Several drugs cause convulsions before death. Even more drugs cause vomiting, fever, heart palpitations and pain. Drug overdose a risky and unreliable method.*

*Which is why I suggest that you please combine it with another method so we can all be sure you are well and truly dead.*

*Scramble as much as you want to, Fat boy, but in four days time it will all be over with. No more bar card for you*

*Cheers—*

*Did you know that suicide by train, statistically speaking, has a 96.2% lethality rate while hanging only has a 89.5% success rate?*

*Of course for someone as fat as you, if you were to hang yourself your head will more likely than not pop off and it would be very disgusting.*

*Please say 'hi' to Mr Potatohead for me! I hear that the Sheriff's*

*office is busying digging into his records. Wonder what they will find? Steve Hartman likely has many MP3 files that are providing much entertainment.*

*I must admit that January 25 cannot come quick enough for me.*

*Cheers–*

So the judge took the bench – as these men looked on smiling and thinking they were going to get \$450,000 in the bag – they had it planned out – they were going to be richer and all would be good :

Sorry that is our bad – that is a mug shot of Mark Sparks...here this one is better :

Darn is all...our bad again...this is a midget shot of sparks....

Sorry our bad again...another mug shot....

Oh...that is better making fun of a drunk guy that fell down some stairs rather than help him? Our bad again...oh here is the correct one :

**MARK C. SPARKS**  
Attorney

Mr. Sparks is a resident of Beaumont, Texas and has been employed by Mostyn Law since 2015. After graduating from Baylor University Mr. Sparks attended law school at The University of Texas School of Law. Following law school Mr. Sparks practiced criminal and family law in Beaumont as well clerking for the Honorable Chief Judge Thad Heartfield. In 2000 he began working at Provost Umphrey Law firm practicing personal injury, contracts, products, medical malpractice and international law.

There we go...so sorry for our mess ups...than then the lead attorney Mr. Jeffery Dorrell (we like the tie) :

So what happened you might ask? They were asking a cool \$450,000 ..... ? Is the suspense killing you? Don't let it. They walked out of court in shock with a judgement of \$7,500. Yes....only \$7,500 after around three years and spending who knows how many hours trying to “take out” attorney John Morgan.

The lesson to be learned here is very simple. Don't screw with a system that can screw with you. And the scam that these guys have been running on the internet with John Smith (aka Thomas Retzlaff) is about over. Almost every court in Texas now knows about the operation – including law enforcement and the federal government. Our guess is they are just sitting back waiting for one of them to continue to screw up and then the trap will be set.

Our guess is the reign of terror is almost over – just two more cases to go – and the boom will be lowered. And those involved with them had better pay attention – their time is coming.

As for now – times up on this case. Now Morgan can go on with his life.
